

Stéphane Pires

Product Engineer

> “Simplicity is a great virtue but it requires hard work to achieve it and education to appreciate it. And to make matters worse: complexity sells better.”
>
> Edsger Wybe Dijkstra

Languages

French
Native

English
Professional - TOEIC (920/990)

Skills

- Product Discovery
- Testing
- Design System

- Typescript - Python
- SQL
- NodeJS
- NextJS - SvelteKit
- AWS - Terraform

Experience

Mai 2026 - October 2026 (6 months) Paris
Senior Software Engineer
Figures

- Owned the Salary Bands module end-to-end, from product and design decisions to delivery, performance and scaling, for 100+ clients and 10,000+ employees' data
- Cut page load by ~60% (p75 FCP 4s → 1.5s) and brought 98% of API calls under 1s (up from 93%)
- Worked AI-first in a 9-person cross-functional team (4 devs, product, manager, DevOps, data), running supervised multi-hour agentic tasks in TypeScript with Claude Code, Codex and MCP/Skills

Sep 2023 - Mar 2026 (2 years 7 months) Paris
Software Engineer
leakmited

- Initiation of the SENTINEL project (POC – product discovery and development) through to delivery and continuous improvement of the TWIN and SPRINT solutions for water network optimization
- Design of ETL pipelines and development of expertise in Mapbox, PostGIS, and geospatial data.
- Worked in an international team, collaborating with data scientists, data engineers, and software engineers to deliver impactful solutions.
- Contribution to the growth of Leakmited from 7 to over 45 employees, including securing €5 million in Series A funding

Sep 2019 - Feb 2023 (3+ years) Antony
Software Engineer
AnalogWay

- Development of key features (authentication, video streaming, etc.) for WebRCS, a React/Node.js application used to control video streaming equipment for live events.
- Promotion and adoption of agile practices (Scrum, Kanban) within a team of 10 web developers.

Personal Projects

Caravel

A platform hosting my blog and CV, showcasing my technical insights and professional journey.

https://caravel-mocha.vercel.app

Abracadabra

Abracadabra is a project that initialize a new MacOS from scratch with my stuff (Tools, plugin, projects, configuration, etc...)

https://github.com/Stephane-Pires/abracadabra

Faraway Solver

A PWA (Progressive Web App) that uses computer vision to manage, track history, and calculate Faraway game sessions.

https://faraway-solver.com/

Education

Audencia
Engineer - Manager
Feb 2020
